React.js Coding Tasks

Coding Tasks

Create a react app that uses the following following API

1. Listing View

   - Now, create a list of all the places under the URL `/places/` inside the react app obtained from the URL

     `https://roadtrippers.herokuapp.com/api/v1/places/`

2. For Detail View

   - Pass the ID to obtain an item from the API response list into the URL `https://roadtrippers.herokuapp.com/api/v1/place/<id>/` and render it under the URL `/places/id/`

3. Use the `Redux` store to implement `favouriting` places concept.
